Applicants: John A. Higgins

Serial No.: 09/676,142 Examiner: Benny T. Lee

Filed: September 29, 2000 Art Unit: 2817

Title: PHASE SHIFTING WAVEGUIDE WITH ALTERABLE IMPEDANCE WALLS AND MODULE UTILIZING THE WAVEGUIDES FOR BEAM PHASE

SHIFTING AND STEERING

Assistant Commissioner for Patents Washington, D.C. 20231

AMENDMENT AFTER ALLOWANCE

Sir:

The Notice of Allowance was issued in this matter on April 9, 2003. Kindly amend the above application as follows:

Specification

Replace the paragraph on page 9, line 26 to page 10, line 4, with the following:

In this example, the two curves intersect at 44GHz (point 40 in the graph). Thus, forming the waveguide with a resonant frequency of 44GHz will allow the waveguide to transmit a 44 GHz signal as if propagating in free space. Changes in the impedance structure's resonant frequency changes the signal's propagation constant. Due to the near-vertical slope of curve 32 at lower frequencies and its near-horizontal slope at higher frequencies, increasing the structure's resonant frequency results in only small changes in the signals propagation constant, while reducing the resonant frequency causes a significant change in the beam's propagation constant.
